

648 Depth Gage Bases will also accommodate the 644 Series.

644, 644M Series Dial Depth Gages

0-3" / 0-75mm

644 Dial Depth Gages

These gages are for longer ranges, and are accurate and simple to use. Put the contact on the work to be measured and push the gage head down until the base stops at the reference point and take your reading.

Furnished with three rounded-end contact points to cover the range. Flat end contact points are also available on special order.

The zero setting can be checked with the (shortest) contact in place by pushing down on a flat surface.

648 Series Depth Gage Bases

These different bases are for mounting indicators with a 3/8" (9.5mm) stem (25SC38 Stem Collet included) or an 8mm stem with optional 25MSB Split Bushing.

644 Dial Depth Gages
