THREAD RING GAGES**

The True Round Adjustable Thread Ring Gage features an adjustment mechanism that maintains the roundness integrity of the gage throughout its use. Aluminum gage bodies anodized green for Go and red for NoGo provide quick positive identification. Inserts are made of oil hardened tool steel. Class and tolerances conform to ASME/ANSI B1.2 or B1.16M. Sizes below 1/4 / M6 are counterbored to hold specified length.

SET PLUG GAGES
STEEL**

Truncated Set Plug Gages are used to set/calibrate Thread Ring Gages. Truncated Set Plug Gages have a common pitch diameter the full thread length with the front portion of the major diameter truncated leaving the rear portion full form. Truncated Set Plug Gages are manufactured to ASME/ANSI B47.1 AGD standard and ASME/ANSI B1.2 or B1.16M. Thread lead, flank angles & straightness conform to class W tolerances, pitch diameter conforms to class X tolerances. For pitch diameter to class W tolerances add 25% to the prices listed. All gages are manufactured of oil hardened tool steel.

Progressive Set Masters (Hi-Lo) available upon request.

GSG CHAMFER GAGE - ORDERING GUIDE

Click on the code to see the interactive Chamfer Gage Catalog

The GSG Digital Chamfer Gage is sold as separate components. When placing a chamfer gage order you must purchase a **GAGE BODY** (shown to the left) along with an anvil end.

Each **GAGE BODY** is programmed for the desired angle anvil(s). Once they have been programmed at our factory they are dedicated to that particular angle.

After purchasing for a particular anvil angle, you can then purchase other diameter anvils but they must be the same angle that the gage was initially purchased for.

Anvils are available individually in both standard and custom sizes or they can be purchased in sets. (see page 41)
