

Fixturing for Keyence IM systems

Instant measurement system fixturing, made simple

The Renishaw QuickLoad™ corner (QLC) fixture is specifically designed to ensure repeatability and provide a secure work-holding for any size, shape or type of part for measuring on your vision system. Hold even the smallest of parts in a wide variety of ways while maintaining a clear view of the part.

Hold virtually anything

Renishaw has a wide selection of modular fixturing components, designed to hold even the smallest of parts, allowing for maximum visibility and probe access without obscuring any critical features.

Cut inspection time

Keep your parts set-up temporarily on multiple plates, switching on and off the machine within seconds. This minimises down time waiting for fixturing to be set up. Both modular and custom plates can be used on the QLC, for even greater flexibility.

Made for easy viewing

Serrations are present on the edges of the QLC. Parts can be easily inspected and viewed when mounted directly against these serrations using Renishaw fixture clamping components, which allow complete access around your part.

Build your fixturing solution

To determine the correct QLC frame to suit your machine, simply identify your machine model below.

Part number	Description	Machine model
R-QLC-KIM7000	QuickLoad™ corner	IM-7010 and IM-7020
R-QLC-KIM7030	QuickLoad™ corner	IM-7030

N.B. for QLCs to fit the Keyence IM-6000 series, contact your local sales representative.

Acrylic fixture base plate

Parts can be placed directly on the acrylic multi-window or multi-hole base plate and are held securely using Renishaw's modular fixturing components, ensuring repeatability and reproducibility.

250 mm x 150 mm acrylic base plate:
R-PV-W-13250150-10-4

250 mm x 150 mm acrylic base plate:
R-PV-13250150-10-4

Quick slide plates:
R-PSQ-2042-4 and R-PSQ-3272-4

Quick slide plates

Quick slide plates attach to the QLC giving you the ability to secure your parts on or between the slides using various Renishaw fixturing components.

Component sets

There are several M4 component sets for fixturing your parts on the base plate. All included options are available in M4 thread. M6 and ¼-20 sets are available upon request.

Additional components can be added to complement your component set, see overleaf for details.

R-CJR-3	M4/M6/¼-20	Rotating 3-jaw clamp

Looking for a custom solution?

If our standard range of modular fixturing does not meet your requirements, we can provide custom fixtures for your CMM, vision system, multi-sensor machine or Equator™ gauge for singular or multiple parts. Let us design and create a custom fixture for almost any size, shape, weight or material parts that you need to inspect.
