<b>TR-KIT-03M</b>	Starter Kit: 62 pcs.

## Optical Comparator Fixture System

The Inspection Arsenal® inspection fixturing system is also available for Optical Comparators.

Anodized aluminum Docking Rails and Fixture Plates are available for any machine and can be swapped between all different machine types.

Both Inch and Metric

This smaller fixture system is perfect for your optical comparators' inspection applications. Loc-N-Load™ fixture rails, plates, and work holding clamps create affordable, repeatable, and durable fixtures that reduce setup time and process more parts per shift. Plates can be dedicated and kept with the job box for fast, repeatable setups.
